

ENTERPRISE ELECTRONIC TENDERING FOR THE PUBLIC SECTOR

Open, fair and transparent

That is the mandate that Public Sector organizations must honour when spending taxpayer money on public works projects or for the procurement of goods and services.

MERX is Canada's largest eTendering service and for over a decade has provided its services to thousands of Public Sector organizations.

For "Open" or "2nd stage/by invitation" tendering, MERX ensures an open and competitive environment for projects put out to bid.

Explore the benefits of using MERX to distribute and track all of your tendering documents and amendments (including plans and specifications for construction projects).

In addition, reduce paper consumption through the use of Electronic Bid Submission and benefit from complete vendor management and integrated reporting for your entire organization. You control your entire project from posting to project award.

MERX Enterprise Solution

Advertise your tenders on your own site while using MERX's advanced tools and reporting to take control of your process and increase internal productivity. Your projects will receive exposure to Ontario's largest database of contractors and suppliers that can provide you with everything from commodity goods and services to specialized IT consulting or complex construction project management.

Key Benefits

- Reduces or eliminates advertising, paper production & distribution costs
- Provides visibility and reporting of the process for Project managers, buyers & management
- Generates increased competition from contractors/suppliers
- Supports enforcement of procurement policies
- Creates a complete audit trail that tracks both buyer & supplier activities
- Increases internal productivity by reducing administrative tasks
- Buyer controls the business process and document management
- Fully supports the distribution of Drawings & Specifications

MERX Enterprise Reporting

Provide control and management insight over your tendering process with real-time reporting.

Executive Management

- Audit trail of the entire process
- View number of projects by department, geography or service provider
- Supplier statistics (active, bidding, winning, geographical distribution)
- Financial performance monitoring

Procurement Management

- Oversight of buying team
- Supplier statistics
- Plan takers list
- Intent to bid/site visit communications / NDA management
- Electronic Bid Submission

Project Managers & Buyers

- Oversight of their own projects and projects of external service providers
- Key supplier activity
- Number of plan takers/bidders list
- Awards
